

Enhanced Ultraviolet Enclosed Dispensers

These fully enclosed stainless steel dispensers come with a carbon filter and can fill 1 gallon and 5 gallon bottles.

- Flow rate is 2 – 3 gallons per minute.
- Base tray for 5 gallon bottles and fold-down shelf for 1-gallon bottles.
- Self-closing door (required by many states).
- Built in drain system.
- Can be installed on a standard countertop.
- Splash free fill system.
- Integrated Ultraviolet sterilization.

Requirements: Electrical Outlet (specify voltage)
Drain location
Access for the waterline from the Pump System

Coolers with In-line Ultraviolet Disinfection

These coolers are placed throughout your facility and a waterline is run from the water purification system to each. A small inline UV system is provided for each of the coolers.
